PRESS RELEASE

OPTOCORE

CMI Music & Audio to handle Optocore distribution in Australia

Fiber network specialists, Optocore, have appointed CMI as their new Australian distributors. The brand provides a strong addition to the Melbourne company's Audio Division portfolio.

CMI CEO, Peter Trojkovic said he was delighted with the appointment, stating that he was impressed by Optocore's ability to provide innovative, scalable and rock solid backbones, embracing open standards. He noted that this will influence a vast range of their core market segments, including events, theatres, stadiums and studios.

"With many fiber-compatible solutions in CMI's portfolio, this marks a strategic move by the Audio Division to position CMI as a one-stop solution for performance, broadcast and commercial audio networking.

"Optocore are the world's most popular and innovative manufacturers of fiber optic networks. With systems already deployed in world class venues such as the Madison Square Garden, Bastille Opera House, Paris and the newly deployed system in the MCG, this appointment advances our position as the leading provider of performance audio solutions in Australia," he continued.

"We look forward to working closely with Optocore's solution engineers in providing time critical, redundant, audio and control infrastructure."

Dawid Somló, Optocore Sales Distribution Manager, responded, "As a brand we have already been recognised by pro-audio professionals in Australia for many years. Therefore, I am delighted for the opportunity to begin cooperation with such a respected company as CMI Music & Audio. It is an important step in the history of our company.

"CMI unquestionably has the competence to implement our fiber solutions, and consequently we hope to expand our presence in the installation, broadcast and hopefully soon to be revived live sectors."

About Optocore
Based in Munich, Germany, OPTOCORE is the world market-leading provider of high bandwidth, low latency, resilient, scalable and flexible fibre optic based networks for the transmission of audio, video and data. For 20 years, Optocore has been continuously innovating and setting new standards with regards to digital network technology. OPTOCORE builds and develops synchronous optical fibre and CAT5 based network solutions for broadcast professionals — for fixed installations and live event applications. Utilising leading-edge technology and high-quality components Optocore guarantees durability and therefore long-term market and customer satisfaction. Due to the open system architecture, Optocore's platform offers other manufacturers the option to transfer conventional standard audio, video and data formats used in the pro audio industry, via an Optocore network. Technical expertise, QoS and an extensive support structure are guaranteed to all customers, together with the highest level of quality.
