## Optocore Environmental Policies

### Manufacturing, Packaging and the Hardware

#### Local suppliers

- Only local companies with good environmental policies are chosen as suppliers
- The use of local suppliers keeps distribution based carbon emissions to an absolute minimum

#### Components and Design decisions

- All Optocore products are fully lead free and ROHS compliant
- Only pure materials are used in the construction of Optocore products
- End of life Optocore products are returned to the factory for careful disassembly and distribution to the correct recycling centres

#### Packaging Cartons

- Only recyclable cardboard cartons are used for the distribution of Optocore products to our customers

#### Power Consumption

- Optocore devices use just 20 Watts under full load conditions per rack mount device

## Office and Staff

### Public Transport

- All staff members are aware of carbon emissions and choose to use Public Transport where possible
- From January 2010, staff will be issued with free bus and rail tickets for travel to and from work

### Office Materials

- All waste paper and packaging is recycled at local waste deposit sites
- Printing of internal documents is kept to an absolute minimum
- All office furniture is made from natural and hard wearing wood
- Only rechargeable batteries are used
- Energy saving light bulbs are used wherever possible

### Promotional Material

- Only organic fabrics are used for promotional jackets and shirts
- We avoid the unnecessary use of plastic packaging where possible
